🎓 EDUCATION

BCA(Bachelor Of Computer Applications) (2019-2022)

Voorhees College affiliated to Thiruvalluvar University, in a Stream of IT.

Pre-University

Government Muslim Higher Secondary School. passed out with an aggregation of 50%.

(2017-2019)

High School

(2016-2017)

Government Muslim Higher Secondary School. passed out with an aggregation of 61%.

◎ SKILLS

FRONT-END:
HTML(HyperText Markup Language)

I have an in-depth understanding of HTML (HyperText Markup Language), which allows me to create the foundational structure of web pages. I'm skilled in using semantic HTML tags, such as <header>, <section>, <article>, and <footer>, which helps in building accessible and well-organized web content. I'm also familiar with forms, input validation, embedding multimedia (images, videos, audio), and creating complex table structures. This helps ensure that my web pages are not only structured properly but are also optimized for SEO and screen readers.

CSS(Cascading Style Sheets)

My expertise in CSS (Cascading Style Sheets) enables me to transform plain HTML into visually appealing web pages. I have strong skills in styling elements, applying colors, fonts, and layouts using CSS properties. I'm proficient with modern layout techniques like Flexbox and CSS Grid, which allow me to create responsive designs that adapt to any screen size. I'm experienced in implementing animations, transitions, hover effects, and pseudo-classes, which add interactivity and enhance the overall user experience. Additionally, I use media queries to ensure my designs are mobile-friendly and look great on all devices.

JavaScript

Although my expertise in JavaScript isn't exhaustive, I maintain a working comprehension of its intricacies that empowers me to implement functional interactivity. I navigate through event-driven architectures with reasonable proficiency, orchestrating event propagation and delegation to facilitate dynamic behavior, such as toggle mechanisms, with selective DOM mutation via methods like classList.toggle or dataset manipulation. My grasp extends to manipulating prototype chains in rudimentary contexts, allowing for efficient inheritance structures where needed. I can implement elementary state encapsulation using closures and manage scope effectively across various execution contexts. While advanced concepts such as asynchronous execution models, including promise chaining and event loops, remain areas for deeper exploration, I am adept at harnessing the synchronous aspects of JavaScript to deliver coherent, albeit not yet fully optimized, interactive experiences.

BACK-END:

SQL(STRUCTURED QUERY LANGUAGE)

Well versed in these things such as Operators, Functions, Sub-Queries, Joins and Sql Statements.

JAVA

Good at things such as Data Types, Operators, Strings, Math, While Loops, For Loops, Booleans and at last If Else.

PROJECTS:

CLONING WEBPAGE

Have made Clones of Netflix and OnePlus mobile.
As well as made my own Portfolio with my own knowledge and skills towards HTML and CSS.
My GitHub Link: https://misbah2002.github.io/Portfolio/

INTERESTS

Photography	Editing and Animations	Diving	Travel	Badminton	Gym

## EXPERIENCE

In my previous role as a Customer Executive at Cogent E-Services Private Limited, where I worked for approximately one year, I was responsible for managing customer interactions and ensuring a high level of satisfaction. My key duties included addressing and resolving customer inquiries by providing clear, concise, and effective solutions. I made it a priority to thoroughly understand each customer's issue and guide them through the workflow and features of our application. This not only helped in resolving their concerns but also empowered them to use the application more effectively in the future. My role required strong communication skills, attention to detail, and a commitment to delivering excellent customer service, which I consistently strived to uphold
